VF310 cable reference diagram

This is a general overview illustrating how the internal PCBs interconnect. The VFD should be switched to 'S-GRAPH' by default, which uses the built in IR controller. Please refer to your motherboard manual for the location of the correct ports and header pins.

1 - VFD/IR module (VF310)
2 - IR selector switch (S-GRAPH is default)
3 - Main power button PCB (M-PWBT-P1)
4 - Standby ATX power cable (M-ATXS-C1)
5 - Internal USB cable (M-IUSB-C1)
6 - Power on/off cable (M-IPSW-C1)
7 - System LED cable (M-SLED-C1)
